

California Proposition 65 Listed Substances

Birla Carbon's carbon black products include all ASTM, BC, CD, Conductex®, Copeblack®, PM, Raven®, and Ultra® grades.

California's Safe Drinking Water and Toxic Enforcement Act of 1986, also known as Proposition 65, requires the State to publish a list of chemicals known to cause cancer or reproductive harm.

Birla Carbon's Carbon Black products contain the following Proposition 65 Chemicals:

- "Carbon black (airborne, unbound particles of respirable size)"
Note: All three listing qualifiers (airborne, unbound (not bound within a matrix), and respirable size (10 micrometers or less in diameter)) must be met for this substance to be considered a Proposition 65 substance
- Certain polycyclic aromatic hydrocarbons (PAHs)* that may be found adsorbed onto the surface of carbon black
- "Carbon-black extracts*"
- Metal impurities*: arsenic, cadmium, lead, mercury, and nickel

*These chemical elements, by themselves, are not used as feedstock in the production of carbon black and are not used as additives in our process. They may be present in trace amounts in carbon black.

The information presented within this publication is based on Birla Carbon's analysis and the analysis of others. Birla Carbon disclaims all representations and warranties regarding performance or use, express or implied, including implied warranties of merchantability and fitness for a particular purpose.
